

patchaya sonta

As a programmer with around 5 years of experience, I've primarily worked on web development projects, both on the front-end and back-end systems

Email : patchaya.sonta01@gmail.com , Tel : 0835624751

Experience

- **2024 - present : Freelance**

Experience designing user interfaces for payment management systems, dashboards, hospital data management websites, mobile applications, and frontend interfaces for construction site management websites. My focus is on creating intuitive and user-friendly designs to improve user experience and efficiency.

- **2021 (June) - 2023 (June) : Associate Software Engineer at Quantumfund**

Work on the frontend to design various user interfaces for fund management systems, including dashboards and report generation.

- **2019 - 2021 (June): Full Stack Developer at GlobeTech Co., Ltd. - CDG**
Full Stack Developer @GlobeTech Co., Ltd. - CDG

- 1.Developed a website showcasing community tourist attractions in Thailand.
- 2.Managed information received from mobile devices through backend API services and database design.
- 3.Planned routes on the website before deployment.
- 4.Provided consultation on web application development.
- 5.Utilized Map API for university student project.

- **2018 (7 month) (Cooperation Education) Full Stack Developer**
@GlobeTech Co., Ltd. - CDG

I have experience in developing websites for managing tourism data in Thailand. These websites are designed to seamlessly migrate data from Excel to web-based databases, facilitating the integration of online tourism information. They provide convenience and efficiency in organizing and controlling tourism data effectively.

Technical Skills

I have experience with Nodejs, Nuxtjs , Next.js, Laravel, Angular, and TypeScript. Additionally, I have worked with PostgreSQL SQL databases and version control using Git.
